

Tutoring - Certificate III Electrotechnology Subjects

At TTA we offer help with all Certificate III Electrotechnology subjects.

Mostly students have difficulty with;

- Magnetism
- D.C. Circuits
- Single and three phase theory
- AC machines, transformers, motor starting and rotating magnetic fields

All our teaching methods are based on extensive practical experimentation.

TAFE nights - Monday, Wednesday, Friday. Saturday 8am start**

All Certificate III subjects are taught.

Advance bookings and payments are necessary, as we prepare in advance for your tutorial. Seats are limited. Please note that classes will be small, for that, one on one attention, to allow apprentices to achieve a passing grade in their subjects. Saturday morning is also available for small group tuition; and afternoons at our practical workshop for hands-on learning.

We offer 2 - 4 hour sessions for Theory and practical electric motor subjects.

Please enquire at the office for more information.

Bookings: Call 0499 011 522 or 8555 5050
